Subject: NEW DEADLINE IS TODAY AT NOON!!! Baseline Data for Carl's A-3 - Public Notice for Community Meetings
Attachments: SF Weekly Remedial Community Pulled 12-12-18.xlsx

Carl's deadline was moved, so now so it ours! Please look at your meetings and fill in this chart with the three dates that we are looking for by today at noon!

I tried to think of a way to make this easier for everyone, so one thing that I thought of was to pull entries from the WAR database with "community" and then exported them. Then I filtered them by section and person. Some people put the staff person as the main contact and others put John, so you will have to look in both columns. I have put a summary below and also attached the larger version that has the description if you need to be reminded of what the entry was for.

This may not have captured all of them, and I understand that it may have captured some entries that do not meet the definition of "non-remedy selection meetings that are not under an NCP" but it is a place to start from!

A main question to everyone is does ANYONE have an example of the notices going out MORE than 3 weeks ahead of a meeting? If so, please email me directly.

THANK YOU!!

Subject: Baseline Data for Carl's A-3 - Public Notice for Community Meetings

Good Afternoon Everyone!

As you know, we are working on measures for Carl's ELMS A3 Project. We are still looking at baseline data to refine the goal that will be included in his PARs. Today we had a brief meeting and discussed the overall process for issuing community meeting public notices, including newspaper publications, fact sheets, and postcard announcements. For Carl's measure, we are considering improving the amount of time before a community meeting contractors receive the final notice materials, which will result in earlier mailout/publication and earlier notifications to the community. In order to set a realistic goal, we also have to collect data on the time it takes once a contractor receives the materials to send them out. This is the data that we are collecting now.

I made a spreadsheet with the baseline data that we are collecting and put it on the RPM SharePoint site here: [Community Meeting Public Notice Baseline Data 12-10-18](#). *Please edit in excel in the browser so that multiple people can edit at once. This will help everyone get their data in on time.*

Not everyone needs to fill this out. Here are some guidelines for who needs to fill out the spreadsheet and what information is needed:

- We are limiting the scope of this project to non-remedy selection meetings that are not under an NCP.
- Data will be collected starting in FY18 (October 1, 2017 until today.)
- The COR/CIC (Jason) will get all of the data for those notices that were funded by the CIC managed task orders. (Thank you Jason!) We think that this is the bulk of the data that we need.
- However, not all public notices are funded through CIC managed task orders. If RPMs have funded a community meeting with RPM managed task orders for a site, the RPM needs to fill in the information for that meeting on this spreadsheet. (Not expecting too many of these, but just seeing how many of these there are.)

We need this data in the spreadsheet by **08 Thursday, 12/13/18** so that we can process it, refine the measure, and deliver it by the end of the week.

Thank you in advance for your work on this! We want to get it right!

Thanks,

Ashley Howard
